

# Share-IT

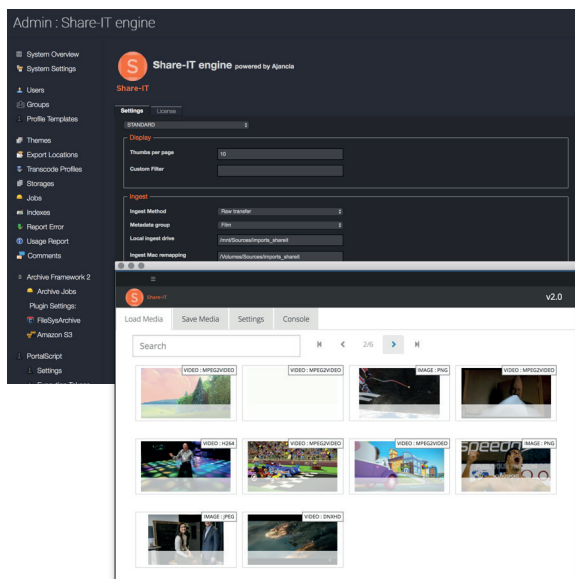

With Cantemo Portal™

Share-IT offers creatives a simple yet highly reliable and secured path to connect **Adobe® graphics with Cantemo Portal™**. This very tight integration offers significant enhancements and an improved experience for the graphics team to collaborate with the rest of the Portal community of users.

## Workstations for graphics teams

Share-IT with Cantemo Portal™ uses the PortalScript™ engine and offers :

## Load media

- Browse, search and import media from Portal within Photoshop
- Open selected ID in a browser to review the clip and associated data
- Display media name, asset ID, asset type and file format inside the Panel

## Save media

- Update existing item or create a new one
- File formats for the saving process can be restricted to the relevant ones only
- Comments can be easily added directly from the Panel

## Settings and console

- All connection settings available from a single tab
- Each request is logged in a console to track licence or connection issues
- Number of thumbnails per page can be configured to improve the experience
